

# ABOVE & BEYOND

AltairStrickland has been one of the country's premier authorities on process unit upgrades, revamps, and turnarounds since 1976 — and we haven't slowed down one bit.

We average 25 turnarounds a year — rising to the occasion for projects large and small — and a full 75% of our clients turn around and come back for more. The reasons? Our obsessive planning and constructability processes help ensure safety and efficiency — all with a focus and goal of delivering highest value for clients before, during, and after.

That's our promise — and that's why, when projects demand the best, more refineries demand the high standards of AltairStrickland.
